

Southwest Advanced Neurological Rehabilitation
Breaking Barriers in Recovery

Friday, September 21, 2007

Two years ago we decided to bring our billing in-house with a Physical Therapy Software Company whom we thought was a viable solution. After months of frustration with this company, we heard about AS/PC and the team at 1st Providers Choice. With an inexperienced biller we were able to use the ASPC software and take control of our own billing. The software is easy to use. We now send all of our Medicare claims electronically directly to Medicare for free.

A professional software trainer came on-site to our office for the initial training and implementation. She was very patient with us and seemed to have a good understanding of what our business needed.

Customer service at 1st Providers Choice is prompt in handling any questions or helping with any billing problems.

The end of the month reports give us a complete picture of our finances. We have been very happy and successful with ASPC and the support provided by the team at 1st Providers Choice.
