

## EMR for **ALLERGIST**

### **A fully integrated EHR / Practice Management solution specically designed to meet the needs of the Allergist / Immunologist**

We understand the unique challenges of the Allergy Practice. IMS for Allergists' is uniquely designed so you can document environmental and allergy histories quickly as it creates custom treatment plans for patients with ease. Instantly document skin test results, create immunotherapy recipes in a dash, administer immunotherapy shots, track patients behind on shots, automatically bill shots, bill serum based on insurance protocols and obtain authorizations and consents prior to patients' anniversary cycles.

#### **Allergy and Immunology Templates and Workow**

IMS will streamline the entire documentation and patient charting process with our unique shot scheduler and skin test templates defining antigens, allergens, histamines, and diluents from a single screen. The template editor lets practices customize and add templates to suit individual preferences, allowing physicians to work as their particular practice and personal preferences demand. Templates feature intuitive pick-lists, and checkboxes to simplify documentation encouraging chart completion.

This fully integrated electronic health records (EHR) and practice management (PM) solution is ideal for the allergist, connecting them to patients, payers, medical devices, pharmacies, labs and other health care entities regardless of the practice size, specialty and number of locations.

Ambulatory EHR

## IMS for Allergist / Immunologist

- Simplify patient visits with allergy and immunology-specific templates for faster, more comprehensive documentation, storage, and retrieval of detailed patient data.
- Enhance workflow with a paperless office. Gain better communications, greater efficiency and deliver better patient care.
- Improve overall revenue with accelerated reimbursement, automatic coding recommendations, decreased denials and increased patient flow.
- Built-in reporting tools scrutinize your practice's patterns for pay-for-performance, meaningful use requirements, quality measurements and business analysis.
- Access patient information at the point of care, no more chart-pulls and no more misplaced records.
- Eliminate redundant paperwork, enable patients to complete forms with patient portal and in-office kiosk.
- Achieve interoperability and connectivity with other health care entities, pharmacies and labs for referrals, orders and results.
- Local ongoing support from a national team of industry experts – Authorized Partners, dedicated to serving the needs and interests of the allergist.
- Automate prescription writing, drug interaction and formulary checking with automatic alerts, and a fully-integrated drug database.
- Easily deliver patient education materials for allergy-specific tests, procedures, and chronic disease management.

### Up to \$44,000

The Medicare and Medicaid EHR Incentive Programs will provide incentive payments to eligible professionals, (Chiropractors are eligible) as they adopt, implement, upgrade or demonstrate meaningful use of certified EHR technology.

### Purchase with Confidence

IMS is guaranteed to meet all of the ARRA meaningful use criteria and requirements or your money-back. How can we guarantee you'll be qualified for HITECH Act incentive payments?

### CCHIT Certification

IMS has received the most current CCHIT certification, and, as of September 30, 2010, the most recent version was recognized by CCHIT as a Stage 1 Meaningful Use certified Complete EHR with ONC-ATCB 2011/2012 Certification, meeting all criteria published by the U.S. Department of Health and Human Services (HHS) in the Final Rule.

### Easily Become a Meaningful User

IMS features a unique Meaningful Use Dashboard that quickly identifies meaningful use deficiencies. Review clinical data with graphical charts identifying patients not meeting clinical measures quickly and easily. Tasks, reminders, alerts and letters can be generated to improve meaningful use status.

Registration begins Jan. 3, 2011.

Participate early to get the maximum incentive payments!

*"We chose IMS and only after a few months of using it, we were convinced that it is the best EHR system on the market. It is a true integrated solution for our practice that has allowed us to become more efficient without the headaches of interfaces."*

## ■ Shot Schedule Templates

Manage your patients' shots more efficiently with defined individualized template shot schedules, track build-up and maintenance shots, modify patient shot schedules as needed, and follow up with patients who have late or missed shots via email and letter templates.

## ■ Shot Template Based Skin Test

Quickly document skin test results when defining antigens, allergens, histamines, and diluents from a single screen. Easily record skin tests using wheal and flare or scores with access of previous test results.

## ■ E-Prescribing and Prescriptions

The flexible and comprehensive prescription module tracks medications and refill history. Improve patient care with drug education integration, dosing, allergy and drug interaction and contraindication checks.

## ■ Vial Management

Manage and track your vials with bar-coded labels for improved patient safety. Quickly create vials with different dilutions for desired concentrations and create lot numbers for tracking of diluents and antigens as well as inventory management.

## ■ Generate Recipes From Skin Test Results

Allows allergists to populate recipes based on skin test results while linking antigens with skin test allergens, creating multiple recipes from one skin test, and minimizing recipe errors.

## ■ Shot Module

Enhance patient safety and improve efficiency by documenting pre and postinjection questionnaires. Patient safety will be ensured with bar-coded vials, automated patient shot schedules, validations and warnings for expired vials, and/or early or late shot administrations, and useful reminders for future tasks, and color-coded shot histories.

## ■ Reaction Checking and Treatment

For quick documentation of reactions and any associated treatments. Document local and systemic reactions, no-reactions or unchecked reactions, define alerts and reminders for critical reactions, and "Link Care" plans for patient education.

## ■ Plus so much more

Late Shot Follow-up, Automated Immunotherapy Billing, and more.

### The IMS Difference

IMS Ambulatory Electronic Health Record (EHR) and Practice Management software are fully integrated sharing a single database, to meet your unique clinical and administrative needs. Our solutions can be implemented as an integrated solution or separately as stand-alone applications and can be deployed as a client-server or web-hosted solution.

It takes more than just software to deliver success in today's complex practice. That's why 1st Providers Choice ensures your success with local Authorized Partners, experienced in health

IT and certified in our solutions. Authorized Partners are with you all the way, from demonstrating IMS to implementation and beyond – your local ongoing single source solutions partner. As your Authorized Partner we're always available for fast on-site or phone support, training and personalized revenue improvement services so you can concentrate on practicing medicine not technology.

In the October, 2009 report titled, "Extensive Evaluations Rank Top Practice Management and EHR Applications," 175 vendors were evaluated by the AC Group on a range of in-depth criteria. IMS was rated 5-stars when evaluated for overall practice management and EHR functionality, ease-of-use, company viability, and end-user satisfaction (p.71). Only 12 of the other 175 vendors received this rating; many of which focus primarily on hospitals or very large practices.

- AC GROUP RANKING of IMS**
-  Practice Management functionality (5 out of 5 stars)
  -  EMR/EHR functionality (5 out of 5 stars)
  -  Ease-of-Use (5 out of 5 stars)
  -  Company Viability (5 out of 5 stars)
  -  End-User Satisfaction (5 out of 5 stars)

## Why a Certified EHR?

To ensure that the system you select will allow you to qualify for Meaningful Use federal incentive payments, select a solution that is EHR Certified. Since there are few benchmark measures available to provide a level of confidence regarding specific EHR functions an EHR certification is very important.

The ONC-ATCB certification has been developed by the federal government to certify that an EHR system meets the technical requirements needed for a provider to become a meaningful user of an EHR system. The use of an ONC-ATCB certified product is required to receive any federal government incentive money for the use of an EHR system. The ONC-ATCB certification test script is very specific to EHR criteria that qualified providers must meet in order to participate in the government incentive program. There are two types of ONC-ATCB certifications; one for Complete EHRs and one for EHR Modules. A Complete EHR certification for Stage 1 Meaningful Use means that the EHR product has met all 33 criteria tested. Whereas an EHR Module certification means that the product meets at least one of the 33 criteria tested.
