

EMR for **PEDIATRICS**

A fully integrated EHR / Practice Management solution specifically designed to meet the needs of the Pediatrician

IMS Pediatrics EHR is an intuitive solution with advanced features enabling Pediatricians to automate their inefficient manual processes and achieve a true paperless environment. Its capabilities include prescription writing, referral management, a laboratory interface, patient education and — specific to pediatrics — growth charts, sick and well baby visit templates, developmental milestones, and anticipatory guidelines. The system integrates the entire care delivery process enhancing the healthcare experience for you and your patients.

Pediatric Templates and Workflow

Quickly and accurately diagnose, treat and manage patients with IMS Pediatric templates. The template editor lets practices customize and add templates to suit individual preferences, allowing physicians to work as their particular practice and personal preferences demand.

This fully integrated electronic health records (EHR) and practice management (PM) solution is ideal for the Pediatrician. Electronically receive and send referrals, review faxed lab reports and import photographs. This allows easy annotations directly to the patient visits on images and photographs at the point of care. IMS Pediatrics EHR allows you to leverage technology to better manage your practice and your patients' health.

Ambulatory EHR®

IMS for Pediatrics

- Simplify patient visits with pediatrician-specific templates for faster, more comprehensive documentation, storage and retrieval of detailed patient data.
- Enhance workflow with a paperless office. Gain better communications, greater efficiency and deliver better patient care.
- Improve overall revenue with accelerated reimbursement, automatic coding recommendations, decreased denials and increased patient flow.
- Built-in reporting tools scrutinize your practice's patterns for pay-for-performance, meaningful use requirements, quality measurements and business analysis.
- Access patient information at the point of care, no more chart-pulls and no more misplaced records.
- Eliminate redundant paperwork, enable patients to complete forms with patient portal and in-office kiosk.
- Achieve interoperability and connectivity with other health care entities, pharmacies and labs for referrals, orders and results.
- Local ongoing support from a national team of industry experts – Authorized Partners, dedicated to serving the needs and interests of the pediatrician.
- Automate prescription writing, drug interaction and formulary checking with automatic alerts, and a fully-integrated drug database.
- Easily deliver patient education materials for pediatrics-specific tests, procedures and disease management.

Up to \$44,000

The Medicare and Medicaid EHR Incentive Programs will provide incentive payments to eligible professionals, (Chiropractors are eligible) as they adopt, implement, upgrade or demonstrate meaningful use of certified EHR technology.

Purchase with Confidence

IMS is guaranteed to meet all of the ARRA meaningful use criteria and requirements or your money-back. How can we guarantee you'll be qualified for HITECH Act incentive payments?

CCHIT Certification

IMS has received the most current CCHIT certification, and, as of September 30, 2010, the most recent version was recognized by CCHIT as a Stage 1 Meaningful Use certified Complete EHR with ONC-ATCB 2011/2012 Certification, meeting all criteria published by the U.S. Department of Health and Human Services (HHS) in the Final Rule.

Easily Become a Meaningful User

IMS features a unique Meaningful Use Dashboard that quickly identifies meaningful use deficiencies. Review clinical data with graphical charts identifying patients not meeting clinical measures quickly and easily. Tasks, reminders, alerts and letters can be generated to improve meaningful use status.

Registration begins Jan. 3, 2011.

Participate early to get the maximum incentive payments!

“We’ve been using IMS for Pediatric for about six months and have gone from paper to paperless. Our efficiency has gone up 110%, our wait times for patients are cut in half and we’re able to see more patients with the same amount of staff increasing our bottom line.”

**Dr. Stephanie Walton,
Walton Pediatrics**

■ Pediatric-specific Symptom and System Based Templates

Documenting conditions and symptoms is faster and more accurate using intuitive templates. In depth complete system and age specific symptomatology. Behavioral conditions such as: ADHD, Autism, Biting, Breath Holding, Spasms, Bruxism, Head Banging, Nail Biting, Pica, Child Abuse, Juvenile Delinquency, Tics, Tantrums, Learning Disabilities, and much more. Templates are pre-loaded and ready to use and are easily customized.

■ Immunizations

Complete immunization tracking with convenient vaccination review and automatic reminders for due shots. Quick identification of missed shots, track referral information and easily send health maintenance reminders for due immunizations.

■ Growth Chart

Record a child's growth, chart and calculate growth patterns graphically and compare child's growth and body mass index. Complete Anthropometrics Management, Auto Calculated BMI, Auto Updating of Growth Charts and View Growth Charts with Multiple Versions.

■ Auto Check-In

Auto Check-In Kiosk feature lets the patients Check-In automatically. This feature reduces workload and helps in managing a high patient flow.

■ E-Prescribing and Prescriptions

The flexible and comprehensive prescription module tracks medications and refill history. Improve patient care with drug education integration, dosing, allergy and drug interaction and contraindication checks.

■ Authorization / Referral Tracking

Reduce missing authorizations and claim rejections with authorization checking at Check-In and Charge Posting. Authorization requirements can be set by procedure and insurance criteria.

■ Document & Image Management

Condense and organize files into a user-friendly, easily accessible digital document file cabinet. Organize documents with customized folder tabs, the integrated fax management module allows you to fax from the system, scan in documents, images, driver licenses, insurance cards, and more.

■ Plus so much more

Scheduler, Patient Portal, Integrated Appointment Reminders, Auto Check-In, Check-In/Out, Lab Orders & Tracking, Letter Writing, My Tasks Dashboard, Health Maintenance Reminders, Dispensary, Document Management, Reports Preparation and Management, Fax Management, Scan Module, Billing & Collections, Auto Form Filler, etc.

The IMS Difference

IMS Ambulatory Electronic Health Record (EHR) and Practice Management software are fully integrated sharing a single database, to meet your unique clinical and administrative needs. Our solutions can be implemented as an integrated solution or separately as stand-alone applications and can be deployed as a client-server or web-hosted solution.

It takes more than just software to deliver success in today's complex practice. That's why 1st Providers Choice ensures your success with local Authorized Partners, experienced in health

IT and certified in our solutions. Authorized Partners are with you all the way, from demonstrating IMS to implementation and beyond – your local ongoing single source solutions partner. As your Authorized Partner we're always available for fast on-site or phone support, training and personalized revenue improvement services so you can concentrate on practicing medicine not technology.

In the October, 2009 report titled, "Extensive Evaluations Rank Top Practice Management and EHR Applications," 175 vendors were evaluated by the AC Group on a range of in-depth criteria. IMS was rated 5-stars when evaluated for overall practice management and EHR functionality, ease-of-use, company viability, and end-user satisfaction (p.71). Only 12 of the other 175 vendors received this rating; many of which focus primarily on hospitals or very large practices.

AC GROUP RANKING of IMS

Practice Management functionality
(5 out of 5 stars)

EMR/EHR functionality (5 out of 5 stars)

Ease-of-Use (5 out of 5 stars)

Company Viability (5 out of 5 stars)

End-User Satisfaction (5 out of 5 stars)

Why a Certified EHR?

To ensure that the system you select will allow you to qualify for Meaningful Use federal incentive payments, select a solution that is EHR Certified. Since there are few benchmark measures available to provide a level of confidence regarding specific EHR functions an EHR certification is very important.

The ONC-ATCB certification has been developed by the federal government to certify that an EHR system meets the technical requirements needed for a provider to become a meaningful user of an EHR system. The use of an ONC-ATCB certified product is required to receive any federal government incentive money for the use of an EHR system. The ONC-ATCB certification test script is very specific to EHR criteria that qualified providers must meet in order to

participate in the government incentive program. There are two types of ONC-ATCB certifications; one for Complete EHRs and one for EHR Modules. A Complete EHR certification for Stage 1 Meaningful Use means that the EHR product has met all 33 criteria tested. Whereas an EHR Module certification means that the product meets at least one of the 33 criteria tested.

“I have been using EMR since 2003 but when I was really looking to go paperless I chose the software program called IMS, because of the different feature they included to get a physician closer to that goal. Because I was familiar with EMR I knew exactly what I wanted and they worked with me to customize the software with templates specific to pediatrics. One of my preferred features is the interface with the state immunization registry followed by the document management as a close second. I also like the different reports we can easily pull. The support staff is pretty attentive to our concerns and they continue to improve on all the different aspects of the software. If you really want to go paperless and be compliant with the different guidelines IMS is the one for you.”
